

**Technology 8**  
**Unit 1 Project 3**  
**Production Process**

You are to create an illustrated slideshow that describes how different materials (woods, metals, plastics) each require different tools and techniques for separating, combining, forming/shaping, conditioning and finishing

Each slide should deal with 1 material and 1 process (Example: How Wood is Combined).

Choose at least three materials with three processes for each material and an picture to accompany each.

Total slide show will be 10 slides (including 1 slide for cover page).

Cover Page slide will contain the title “Production Processes” and your name.

File to be saved as **Production Processes First Name Last Name.ppt (or .pptx)** and uploaded using dropittome.

Marks will be awarded as follows:

- Correct file name – 1 mark
- Uploaded using dropittome – 2 marks
- Title slide with title and your name – 2 marks
- 3 different materials – 3 marks
- 3 different processes explained for each material – 9 marks
- Each process clearly explained – 9 marks
- Picture for each process – 9 marks

**TOTAL: 35 marks**
